

## High Pressure Test Units

High Pressure Test Units are provided in working pressure ranges from 5,000 to 30,000 PSI.

These units are recommended for high pressure testing of BOP stacks, choke and kill lines, Christmas trees and any other type of equipment requiring high pressure static testing. Test Units are available in unit-mounted, portable, skid-mounted and high flow electric driven styles. Accessories include stand-mounted chart recorders and high-pressure hose assemblies.
